[LinkedIn](#) | [GitHub](#)

Frontend Engineer specializing in B2B SaaS dashboards and workflow applications. Demonstrated success in driving product growth by 39% and boosting user engagement by 25%. Seeking a mid-level role to leverage expertise in React and complex, data-heavy user interfaces.

## PROFESSIONAL EXPERIENCE

---

### AUTOMOTIVE MANAGEMENT SYSTEMS

United States, Ohio

Frontend Engineer

April 2025 - Present

Consulting on the development of the Minimum Viable Product (MVP) for a Dealer Management System (DMS) dashboard, aimed at streamlining operations for automobile dealerships. Engineered the frontend dashboard using React, Material-UI, React Context, Bootstrap, React Router, Moment.js, and FullCalendar, prioritizing responsiveness and user experience. Contributed to the strategic design and implementation of core features to optimize dealership workflows.

### SOCIALITY.IO

United Kingdom, London

Frontend Engineer

November 2022 - April 2025

As Sociality.io's Frontend Engineer since Nov 2022, I've led SMM Dashboard feature development using React (TypeScript), Redux, and React Native, boosting user experience and increasing website engagement by 25%. I've collaborated cross-functionally and managed tasks independently. During my tenure, the product launched on Product Hunt, achieved a top 5 badge, and grew 39%. Led development of Social Media Management Dashboard features, collaborating with the team for enhanced functionality and user experience. Utilized React (TypeScript), Redux, RTK Query, and React Router for state management and routing. Collaborated with design and backend teams, providing insights to improve processes and features and ensuring smooth integration. Managed project time and tasks independently, keeping the team updated on progress and timeline changes. Contributed to new Mobile App features using React Native, improving functionality and user experience.

### NETAS TELECOMMUNICATION

Türkiye, Istanbul

Software Design Engineer

April 2022 - November 2022

Developed the frontend design of the PRM (Partner Relationship Management) Project using Vue.js and ElementUI. Collaborated with an Agile team to create a user-friendly interface for the PRM application.

## EDUCATION

---

### GAZIOSMANPASA UNIVERSITY

Türkiye

*B.S. in Mechatronics Engineering*

2015 - 2020

- I had a C# Class in my university. Then I had a Python Class.
- Optimized autonomous driving and image processing algorithms for a 4-person UAV team, resulting in a 9th-place finish in international competitions.

## ADDITIONAL INFORMATION

---
